

# Installation Manual

## LED Tri-proof Light

### Tips

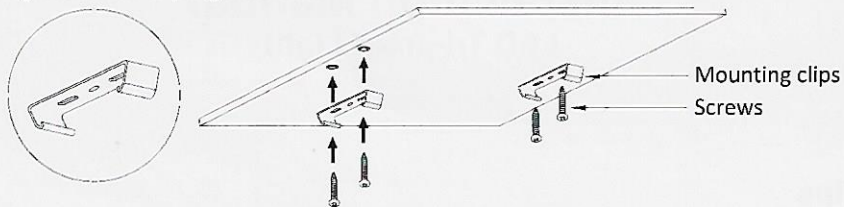

- Please install the lamp by the professional person.
- Please Keep this manual for maintenance and repair purpose.
- Please strictly refer to the manual for installation. Improper installation may lead to falls, electric shock and fire.
- Please do not retrofit lamps or replace parts, in order to avoid electric shock and fire.
- The lamp should work with AC85-265V.
- Please power off and contact the local distributor when the lamp does not work normally.
- Please power off when replacing the parts or maintaining the lamp in order to avoid electric shock.

### Product Photo

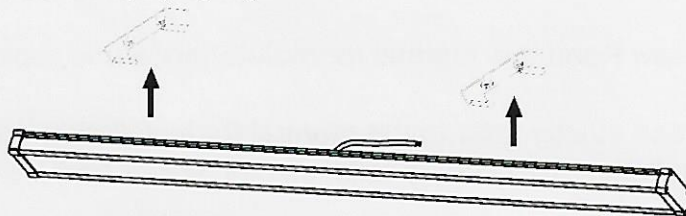

## Option 1: Ceiling Type Installation

1. Drill 8mm cutting holes, put plastic plug and lock the clips on the ceiling with self-taping screws.

2. Put the lamp into the clips properly.

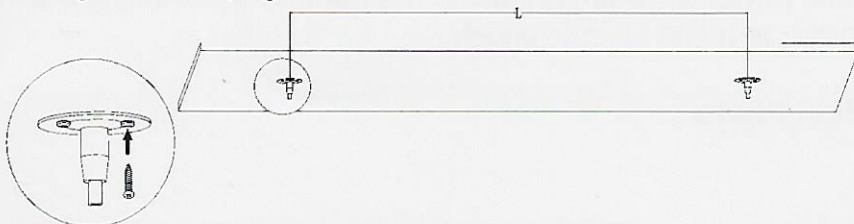

3. Connect to the power with AC85-265V.

## Option 2: Hoisting Type Installation

1. Drill 8mm cutting holes, put plastic plug and lock the clips on the ceiling with self-taping screws.

2. Hang the lamp with lifting role and clip and then connect to the power with AC 85-265V.
